

180,000+ Cycle Testing

Industries Most Robust and Longest Lasting Actuator

Flat Act is an exclusive new product developed by HDC Inc. It is the industries most robust actuator with 12 pounds of push and pull. Flat Act is also the longest lasting actuator available, still strong after 180,000+ cycle testing. The new actuator design is smaller and flatter than traditional styles, giving installations more freedom. Another feature unique to New Act is the detachable nose-piece capability. This feature allows versatile install situations without actuator replacement.

Red Actuator: Part# RA

Pat. and Pat. Pend.

- Spring Detent
- 2-Wire Actuator
- Detachable Nose-Piece Ability

Ideal For:
Spring Detent Latches
